

# Lookin' at Idiots in Cars

madisonbiketowork.club

Location/Street Name: \_\_\_\_\_ Weather/Temperature: \_\_\_\_\_

Date: \_\_\_\_\_ Start Time: \_\_\_\_\_ End Time: \_\_\_\_\_

Bad Behavior	Count
What do you see happening on the street?	Use tally marks to record each observed behavior
Big-ass pickup truck not towing or hauling anything	
Rolling stop at a stop sign	
Stopped on the crosswalk	
Definitely could have stopped at that yellow light	
Straight-up ran that red light	
Clearly talking on their phone (not hands-free)	
Clearly texting/checking email/playing Angry Birds	
Giant SUV with no passengers (single-occupancy planet killer)	
Entered the crosswalk while a pedestrian was crossing	
Waaaayyyyyy too fast	
Other dangerous behavior 1	
Other dangerous behavior 2	
Pretty normal driver/everyone else	

At the end of your observation, sum up all the tally marks to get the total number of drivers observed:

Sum of all tallies	
--------------------	--

You can divide the number of tallies in any category by the total to get the percentage of drivers who suck for some particular reason.

Other dangerous behaviors you might want to tally include: • lights off but it's kinda dark • windshield not clear of snow • anti-social use of horn • no turn signal while turning • no turn signal while changing lanes • obnoxious revving because you have no friends • blocking a bike or bus lane like a jerk • lifted trucks • aggressive lane changes • no hands on the wheel • fascist symbols or bumper stickers • cybertrucks • general shittyness
